With a system consisting of over 90 autonomous dealers, the lift truck group provides quality materials handling equipment to the wide-ranging North American market. Doosan Infracore America Forklift dealers successfully operate in over 220 service and sales locations throughout Canada and the U.S. The lift truck product line remarkably includes 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous truck versions range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American marketplace, due to its outstanding level of product performance and their consistently high level of client support and service given to all Doosan Infracore Lift Truck clients. The U.S. forklift division based in Cleveland has a skilled team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

In the beginning the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a home-based machinery expansion project. Product sales of these products were primarily targeted to state-run companies, large scale corporations, and the military. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Daewoo started the first domestic forklift business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological improvements combined with sales success placed them in a position of significant growth of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling industry. This endeavor greatly expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a modern plant which helped launch the company for the fabrication of high end added-value goods suited for export. In 1993, the corporation had a global sales network and started exporting designs they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international marketplaces.
