

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

While on their trip, John spent time talking to previous business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a substantial market for a product that could quickly and safely lift people in the air to accomplish upkeep and other construction functions.

After their return from holiday, John set up a business with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into existing designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into several international marketplaces and continues to cultivate innovative machinery to ensure that clients are able to become safer and more well-organized within their workplace.
